

Alumni & Campus Community Platform

Version: 2.0 (Production Ready)
Scope: Client, Chat & Admin Portals

Comprehensive Non-Technical Product & Feature Reference Guide

Objective for the Documentation Team:

This document translates the complete architecture, modules, workflows, and administration tools of the BFGI Alumni platform into clear, user-friendly concepts. Use this reference to write step-by-step user manuals, help center knowledge bases, FAQs, and onboarding documentation without requiring any programming knowledge.

1. System Architecture: The Three Main Portals

The digital campus ecosystem is divided into three distinct user environments designed for specific goals:

Portal Name	Primary Purpose	Target Users	Key Highlights
Client Portal (Public Web)	Public face of the institution showcasing news, events, campus memories, and alumni directory.	Guests, prospective students, current students, general public.	Modern landing pages, event discovery, research updates, campus photo gallery, contact helpdesk.
Community & Chat App (Social Hub)	Interactive social network for peer networking, direct messaging, and community discussions.	Registered students, verified alumni, faculty mentors.	Real-time 1-to-1 messaging, social feed, post likes & threaded comments, developer portfolio showcase.
Admin Portal (Management Cockpit)	Centralized control room for institutional staff to moderate data, verify alumni, and oversee operations.	College administrators, department heads, super admins.	Alumni credential verification, event creation & attendee rosters, gallery management, ticket resolution.

2. User Roles & Permission Matrix

Access to features is governed by clear user roles to ensure security and institutional integrity:

Role	Definition & Eligibility	Permissions & Capabilities	Verification Status
Guest / Visitor	Unregistered public visitor browsing the institutional site.	View public home page, research posts, public photo albums, upcoming event catalog.	None (Public)
Student / User (USER)	Currently enrolled BFGI student or new platform registrant.	Browse alumni directory, register for events, raise support tickets, comment on community posts.	Standard login
Verified Alumni (ALUMNI)	Confirmed graduate of Baba Farid Group of Institutions.	Official Blue Checkmark, create posts, share portfolio in Developer Showcase, 1-to-1 direct chat.	Verified via Degree / ID Card review by Admin
Admin (ADMIN)	Designated college staff member or department coordinator.	Verify alumni documents, create & edit events, manage attendee lists, answer helpdesk tickets.	Staff Authorization

Super Admin (SUPER_ADMIN)	Institutional leadership and platform administrators.	Full master access: assign admin privileges, manage all modules, download institutional analytics.	System Master
-------------------------------------	---	--	---------------

3. Functional Modules & End-to-End Workflows

Below is a detailed breakdown of each major functional module with step-by-step user workflows.

MODULE 1: Authentication, Onboarding & Alumni Verification				
What it does: Secures the platform, ensures accurate role assignment, and provides a credential verification pipeline for alumni. • Registration: Users provide Full Name, Email, Password, and select their Department (e.g., <i>School of Engineering, School of Computer Applications, School of Business Studies</i>). • Verification Submission: Users upload a photo/scan of their Student ID Card or Degree Certificate. • Admin Verification: Admin inspects the document in the Admin Portal and grants the official verified badge with one click.				
Step 1: Sign Up	Step 2: Log In	Step 3: Upload Proof	Step 4: Admin Review	Step 5: Verified Badge
Fill basic details & select school branch	Secure email & password authentication	Submit Degree or ID card image	Admin validates document authenticity	Account elevated to Verified Alumni

MODULE 2: Community Feed, Social Posts & Engagement			
What it does: Powers interactive communication across campus members with social posts, comments, likes, and project showcases. • Publishing Posts: Users share updates, text, and photos. Special posts can be tagged as Developer Showcase to display portfolios. • Likes & Reactions: Members can like posts and comments with instantaneous counter updates. • Threaded Discussions: Supports nested replies—users can comment directly on a post or reply to another member's comment to keep conversations organized.			
1. Create / Browse	2. Engage / Like	3. Comment Thread	4. Reply to Sub-Comment
Write post or showcase tech project	One-tap like reaction with live count	Post a direct comment under any update	Nested multi-level conversation thread

MODULE 3: Directory Search & Multi-Criteria Filtering

What it does: Enables users and staff to pinpoint alumni, events, and gallery records through structured search.

- **Alumni Directory Filters:** Filter graduates by Department (Engineering, Computer Applications, Agriculture, Management, Sciences), current employer/company, and graduation year.
- **Event Catalog Filters:** Filter events by *Online vs In-Person* and *Global (Campus-wide) vs Departmental*.
- **Media Search:** Instant search across campus albums and celebration archives.

MODULE 4: Real-Time Chat, Following & Connection System

What it does: Facilitates direct mentorship, batchmate reunions, and professional networking.

- **Follow Network:** Follow alumni or mentors to keep track of their contributions and industry updates.
- **Instant 1-to-1 Chat:** Private direct messaging with read receipts and active presence indicators.
- **User Safety & Privacy:** Users can clear individual chat histories or block malicious accounts to maintain a safe campus space.

MODULE 5: Campus Events & Digital Ticketing / RSVP

What it does: End-to-end event discovery, RSVP reservation, seat limit enforcement, and registration tracking.

- **Discovery:** Browse dates, venue details, organizing committee, and event visibility.
- **RSVP & Digital Seat:** Students/Alumni enter contact information to reserve their spot. If an event reaches its registration limit, the portal automatically marks the event as *Registration Closed*.
- **Organizer Dashboard:** Event managers view the live attendee roster and export participant sheets.

MODULE 6: Campus Memories & Gallery

- Organized photo albums categorized by event, year, and department.
- High-resolution viewer with full-screen photo display.
- Admin image uploader to curate college history and festival archives.

MODULE 7: Helpdesk & Support Tickets

- Submit queries regarding transcripts, degree verification, or technical help.
- Priority assignment: *High, Medium, Low*.
- Admins track status from OPEN to RESOLVED.

4. Admin Management Portal: Non-Technical Screen Guide

Here is what college staff see and do inside each section of the Admin Management Portal:

Section / Screen	Non-Technical Description	Key Action Buttons
Analytics Dashboard	High-level overview showing total registered users, verified alumni count, active events, and open support tickets. Includes charts showing monthly growth.	View Metrics, Filter Time Range
User Verification Center	Displays a queue of alumni who uploaded certificates/ID cards. Staff can inspect the uploaded image next to the user's branch and graduation year.	Approve Verification Reject / Request Resubmission Promote to Admin
Events Management	Create new college events, set dates, venue, upload promotional banners, and set seat capacity. View list of registered attendees.	+ Create Event Edit Event Export Attendees List

Gallery & Album Studio	Create event albums (e.g. <i>Convocation 2026</i>), upload batches of photographs, set cover images, and categorize memories.	+ New Album Upload Images Delete Image
Helpdesk & Support Queue	Central inbox of user-submitted queries. Staff review tickets, contact the user, and mark issues as resolved.	View Ticket Mark as Resolved Filter by Priority

5. Step-by-Step User Journey Scenarios

Technical writers can turn these real-world scenarios directly into user guide chapters or tutorial videos:

Scenario A: New Graduate Onboarding & Networking

- 1. Registration:** Rohan (Alumnus, Batch of 2024) opens the website and signs up using his email and selects *School of Computer Applications*.
- 2. Verification:** He opens his Profile Settings, attaches a photo of his Degree Certificate, and clicks Submit.
- 3. Staff Approval:** A college admin reviews Rohan's document in the Admin Portal and clicks **Approve**. Rohan's profile now displays the blue **Verified Alumni Checkmark**.
- 4. Community Interaction:** Rohan writes a post sharing his new job role at a tech firm. Peers like and comment with congratulations.
- 5. Live Networking:** Rohan searches for his college roommate in the Alumni Directory, clicks **Follow**, and initiates a real-time **1-to-1 Chat**.

Scenario B: Student Discovering & Registering for a Campus Fest

- 1. Discovery:** Ananya (3rd-year student) browses the Events section on the Client Portal.
- 2. Selection:** She finds the *Annual BFGI Tech Innovation Summit*, reads the schedule and speaker list.
- 3. RSVP Submission:** She clicks **Register Now** and confirms her phone number and current department.
- 4. Instant Confirmation:** The system issues her an immediate registration confirmation. The remaining seat counter updates in real time for other students.

Scenario C: Administrator Organizing an Alumni Meet & Tracking Attendees

- 1. Login:** Professor Sharma logs into the Admin Portal.
- 2. Event Creation:** In **Events Management**, he clicks **+ Create Event**, enters event title, venue, and sets a 250-attendee limit.
- 3. Monitoring:** As alumni register from across the country, he tracks the live attendance bar.
- 4. Roster Export:** On the morning of the event, he downloads the complete attendee sheet with one click for the campus reception desk.

6. Non-Technical Glossary for Content Writers

Standardized plain-English vocabulary to use consistently across all user guides:

Term	Plain-English Definition for End-Users
Verified Alumni Badge	A blue checkmark indicating that college administration has verified the member's degree credentials.
Developer Showcase	A special category of post where members exhibit software, robotics, or design projects.
Global vs Departmental Event	Global events welcome the entire campus; Departmental events are tailored to specific academic branches.
Help Ticket	A digital support request sent to administrative staff for transcript, verification, or account assistance.
Alumni Directory	The searchable campus phonebook of all registered graduates, categorized by school and graduating year.
